

St. Elizabeth PHYSICIANS

St. Elizabeth Physicians is a multi-specialty physician group consisting of 372 physicians, 125 advanced practice providers and more than 1,100 non-provider associates.

We serve more than 300,000 patients in our 116 conveniently located sites in Kentucky, Ohio and Indiana.

In partnership with our five St. Elizabeth Hospitals, together we are transforming how healthcare is delivered in our region.

We offer communities a new model of care whereby physicians, hospitals and support services fully integrate into a team of providers to serve our neighbors in the Greater Cincinnati market.

We are dedicated to our community and united in our focus to introduce innovative treatments, technology and processes that lead to the improved care of our patients, better customer service and the overall health and wellness of our region.
